Imaging and Machine Vision Europe - For suppliers, integrators and OEMs using machine vision

Greg
Blackman
Editor

The Covid-19 pandemic has caused a lot of uncertainty in the markets machine vision serves, but the value of vision technology in manufacturing and many related sectors remains undiminished. As a publication, *Imaging and Machine Vision Europe* continues to champion the benefits of industrial vision for engineers and scientists. Our editorial coverage keeps readers informed about new technology and market trends, and ultimately how machine vision can improve businesses.

With digital communication coming to the fore this year, we're pleased to increase the number of live webinars we offer, which give a chance for engineers to present their latest technology or to discuss trends happening in the vision industry. We're holding two live panel discussions at the end of 2020 - one on AI and the other about 3D vision and robotics - and we hope

to continue to do so in 2021, alongside presentations examining case studies or new imaging equipment. These webinars are recorded live with the opportunity to ask the speakers questions.

You'll be able to find past webinars on our website, www.imveurope.com, along with all our editorial content - the latest industry news, analysis, and feature articles. Our digital offerings also include monthly email newsletters - IMVE Newslines and Productlines - to keep subscribers up to date with the latest news and commercial products.

Our analysis and opinion slot is now well established, a place for experts to write on an aspect of machine vision that resonates with the industry as a whole. These commissioned pieces give opinion, backed up by analysis, on a wide range of topics from the people at the centre of the story.

“Imaging and Machine Vision Europe... will continue to support the industry as we come out of the pandemic and grow in the years ahead.”

We are also maintaining our editorial partnerships with the European associations EMVA, VDMA, and UKIVA, which help guide our content and provide relevant and insightful input.

The editorial content is complemented by a suite of content advertising options, to get information about your technology to our readership of OEMs and vision integrators. There are opportunities to present your technology – in case studies, white papers, and what we are calling Tech Focus – along with your opinions through our Viewpoint channel on our website.

But it's not all about digital; our print editions of the magazine are packed full with insight and useful information, and continue to be a staple of engineers using vision technology. Alongside the regular six print editions, we also publish our Vision Yearbook, an annual reference point for the

vision industry, featuring in-depth analysis, market forecasts and a comprehensive suppliers directory.

It's a potentially unsettling time for many in the machine vision industry, with a change in mindset for how companies find customers and conduct business. *Imaging and Machine Vision Europe*, as a source of information dedicated to the vision sector, will continue to support the industry as we come out of the pandemic and grow in the years ahead.

to reach?””

Who are we?

Imaging and Machine Vision Europe is Europe's only dedicated magazine for design and production engineers working in the scientific imaging and machine vision market.

Reaching more than 15,000 industry professionals throughout Europe and beyond – and across more platforms than ever before – *Imaging and Machine Vision Europe* remains your first choice to market your vision technologies.

Job function

**Build
your
brand**

We all know that ensuring positive brand presence is the non-negotiable foundation for any serious business. It supports the direction of your organisation and facilitates the success of everything you do throughout the year.

In theory, brand visibility is simple. Make sure you put your message in front of the right people, as often as possible.

In reality, there are pitfalls at every turn. Everything is 'the next big thing', and it becomes very easy to be positioned in the wrong place and end up throwing good money after bad.

Imaging and Machine Vision Europe has brand-supporting options available across all platforms, so let us be your partner as you build your presence. Our suite of 'brand visibility' products place you alongside relevant, consistent and trusted third-party content.

The goal is often to generate new engagements and attain high-quality leads, but it all starts with a base of trust in your brand.

Build your brand Magazine

Imaging and Machine Vision Europe started as a print magazine. Over the years we have introduced a digital version for those who prefer a digital format, and increased the places where it is distributed – at heart though, it is the foundation of everything.

Work with our advertising team to start your campaign here. You could focus on relevant features and events that you are attending, or perhaps you feel that you would like to be visible all year around.

Editorial calendar 2021

Bonus distribution

Make your exhibition work harder for you! By focusing on the events you attend, you can stop worrying about whether you get value from three days' hard work and instead make sure your message is driven home before, during and after the show.

Of course the uncertainty around the impact of Covid-19 has made physical events less reliable. Our events team works with each organiser to make sure we distribute to those audiences whether the event is virtual or physical.

“I know digital platforms are important, **but how do I know I am being seen by the right people?**”

Build your brand online and via email

Reaching the digital *Imaging and Machine Vision Europe* audience has never been easier. The website is a hub of analysis, feature content, technical videos and news, while our regular email newsletter, Newsline, is an opt-in news and feature service delivered to inboxes every month.

Both the website and Newsline are presented in a traditional desktop format and via a responsive mobile version.

Why use the *Imaging and Machine Vision Europe* digital brand-building suite?

Relevance

You will be seen by an audience of OEMs and vision integrators

Credibility

Our content is independent. Being alongside this content, means you are associated with this third-party credibility

Platform

Being seen in a digital environment is increasingly important. Being seen by an opt-in audience on these platforms is perfect

Using content

‘Using content’ is a broad term. We hear about it all of the time, and there is no doubt that the production and delivery of content is a complex area. You produce lots of marketing content and here at *Imaging and Machine Vision Europe* the delivery of quality content is our lifeblood.

How do we join forces to harness the value of what we collectively produce and deliver a better all-round experience for our audience?

With *Imaging and Machine Vision Europe*, ‘using content’ means:

- Delivering your content to our audience
- Associating your organisation directly with our content
- Combining your expertise and our platforms to do a bit of both!

Our ‘using content’ suite provides intelligent hosting and distribution of your:

- Technical explanations
- Visual demonstrations
- Application case studies
- Thought-leadership/opinion influence

That’s not all, though!

Imaging and Machine Vision Europe is always looking for ways to improve our audience experience. We have some super-cool, exclusive opportunities for native advertising. This puts you directly into the main stream of *Imaging and Machine Vision Europe*’ editorial. Prime real estate!

“Sure, I have some solid branding in place, **but how can I use the content I have worked so hard to produce?**”

Content Sponsorship

The first way we can use content is for you to associate yourself with the regular *Imaging and Machine Vision Europe* offerings. We have two great ways for you to do this.

A&O section sponsor

The Analysis and Opinion (A&O) section of our magazine and website is a collection of exclusive editorial columns written just for us by leading experts from throughout the world of machine vision and distributed across a multitude of platforms.

Sponsoring this section is about being part of the conversation. We could be talking about political change, environmental issues, vocational development – who knows! The topics may vary, but the value for you remains – make being part of the conversation one of your core brand-values.

A&O is delivered in-print, hosted online and via a stand-alone email. You will receive:

- Logo on (A&O) page of website;
- Logo on monthly A&O emails;
- Logo on A&O pages in magazine

A&O section sponsor price
£995 per issue

Webcasts

Following the Covid-19 pandemic, webcasts have become increasingly important as people look to become positioned as an industry thought-leader.

***Imaging and Machine Vision Europe* has two ways that you can work with us on Webcast delivery**

Sponsor a *Imaging and Machine Vision Europe* Webcast

As the year goes on, our editorial team will produce webcasts that are completely editorially-led. This means that rather than a calendar of topics set out at the start of the year, the webcast will be focussed on timely industry discussion. You can sponsor these events!

What do you get as a sponsor?

- Branding on all pre-event, post-event and in-event activity and promotion (across all platforms)
- Leads – Since these webcasts are free-to-attend, delegates will have the opportunity to opt-in to your marketing lists at the point of registration.

Co-sponsor an existing webcast.

Your logo on the webcast page and all pre- and post-event publicity; plus receive the leads of attendees.

- Topics announced regularly (or suggest one!)
- Promoted in magazine, online and via email.

Co-sponsor of technology webcast
£2500

Webcast sponsored editorially led option
£1495

Sole sponsor

Here, you are in control of everything. The content is driven by you, and as sole-sponsor, you will receive all leads.

As sole-sponsor of your webcast you get:

- *Imaging and Machine Vision Europe* team as host, moderator and coach (we will offer pre-event run-throughs, format coaching, as well as helping with suggestions for topics and case studies)
- 3 x pre-event promotions to the *Imaging and Machine Vision Europe* database
- 1 x post-event promotion to the full database
- House ad in the magazine
- Hosting online
- Promotion via *Imaging and Machine Vision Europe* social media
- MP4 of the event for your own use
- List of questions asked during event
- All lead data – ‘lead data’ refers to a one-time follow up from you, with permission required as part of registration. Delegates will also have the opportunity to opt-in to your marketing lists at the point of registration

Webcast sponsor
£8000

Using Content – Hosting your content

These products have your offerings at heart.

You work hard on creating your own innovative content – so why not partner with us to present it to a wider audience than simply your own database?

Imaging and Machine Vision Europe has designed these products to focus on relevance, interactivity and ultimately the combination of your expertise and our platforms to provide our audience with a better experience.

Tech Focus

Tech focus brings the focus onto a particular technology and delivers an editorial overview of this industry area, as well as the products available across that market.

Tech focus is multi-platform (print, online, email and socials), allowing you to place your content alongside our own in the full knowledge that the topic is on-point and the audience is engaged and relevant. There are two options here – look at the calendar for your area of expertise and choose either:

Lead sponsor (One sponsor per topic)

- Exclusive branding on magazine and online version;
- Sole sponsor branding on the email version, including 468 x 60 banner;
- Top-spot 'enhanced product' in both magazine, email and online version
- 3x positions linking to your content on the Tech focus email – use your videos, app notes, stories etc here

**Tech focus
lead sponsor**

£2950

£850

Productline

Productline is our popular entry-level email marketing service for new product launches. It also provides a cost-effective platform for you to drip-feed your product information to a huge audience. As you build your full campaign, use Productline as a targeted tool to back-up your high-visibility activity.

- Comprises headline, 190 x 190 image, 40 words plus web link
- Sent via email (nine products per email) to opt-in database of 11,000 industry professionals.

Productline price

£500 per issue

Featured productline price

£850 per issue

White Papers

The *Imaging and Machine Vision Europe* reader is typically a high-level industry professional and as such they crave high-quality information. You should use this to your advantage.

By hosting your white paper with *Imaging and Machine Vision Europe*, you place yourself as a thought-leader, reach the right audience with very specific content and of course, generate leads.

Our white paper package includes:

- Hosting online for a year (including front page promotion for a minimum of one month)
- Promoted via 'educational resources' email
- Highlighted via house advert in magazine
- Option to gate content and collect

White paper price

£1250

Using Content - Native Advertising

The third way of using content in partnership with *Imaging and Machine Vision Europe* is through native advertising.

Here we look for ways that your expertise and experience can enhance and complement what our audience already receives, then place it directly into the main stream of editorial content. Our editorial integrity is paramount here so the focus is squarely on quality – when we work together on projects we consider it a partnership and will guide you as we go.

Featured case study

A feature case study appears alongside a related feature (see our editorial calendar for our planned features for the year), both in the magazine and online.

Comprising approximately 750 words, plus an image, a feature case study is a full page of content, designed to appear a part of the feature. You can supply the content yourselves, subject to it meeting our editorial standards, or we can work with you to create it.

An excellent feature case study frames our existing topic in a way that the reader can personally relate to.

- One feature case study available per pre-planned feature
- PDF and copyright provided post-publication (for your ongoing marketing activity)

Featured case study price

£2950

Viewpoint

Viewpoint represents an opportunity for your company to demonstrate thought leadership or leading opinion. From your CEO to your technical director and beyond, you will have a broad range of experience in your company, and more often than not, they'll have the experience and knowledge to form an opinion on industry-wide matters that others will be interested to hear. Raise their personal profile, and show how the expertise within your company places you above your competitors.

- Comprising approximately 750 words, plus an image, a viewpoint appears online only, but is promoted via the magazine (as part of our own house adverts), and via email.
- Can be written entirely by you, subject to our editorial standards, or with our help.

Viewpoint price

£1250

(additional charges may apply if using our editing and writing services – see Content Services)

Featured Technology + White Paper

If you have a genuinely disruptive technology, we will create an article that uses the information detailed in your white paper as the catalyst.

Considering whether your technology is disruptive means asking 'does my technology affect the industry in a new and exciting way?'

It could influence efficiency, cost, speed, or the environment.

Also, talk to us! We consider this a partnership and will work with you.

It is important to remember that the article is *Imaging and Machine Vision Europe* content so will be written by us and will have our audience in mind. You will not be asked to write the content, but may be invited to contribute in a similar way to our usual features. Your white paper will be advertised at the end of the article.

- Appears as two pages in the magazine, comprising a 1,200 word feature (written by us), plus a half-page house advert pointing towards your white paper.
- Also appears online as a feature, with a footer advert pointing towards your white paper.
- Featured on our educational resources page.
- Promoted via email campaign
- Highlighted via house advert in magazine
- Option to gate the white paper online and collect lead data

**Featured technology
+ white paper price**
£2950

Content services

High-quality writing is in short supply, and many marketing teams simply don't have the in-house resource to be able to turn out the right content frequently.

This para needs updating: Outsourcing to a freelancer or a PR company is always an option of course, but few will have the specialist expertise to rival our own editorial team members, each of whom has many years' experience in writing about the machine vision industry.

We can also help improve your existing content so that it appeals to a wider audience.

Every project will be different so we will work with you to create a finished piece that enhances your brand image and places you at the forefront of your industry.

Case Study/Viewpoint/ White Paper writing service:

Well-written content can be a hugely effective way of framing your technology, so let's work together to tell the story within the story. A member of our team will work with you to create your content, providing you with a finished product written in our style, and fitting perfectly with the 'feel' of *Imaging and Machine Vision Europe*.

£500 per 1,000 words

Editing and copy improvement service:

Where your content doesn't quite meet our own high editorial standards, we can help with copy improvement and editing. We will only charge you for the time it takes to satisfy our editors.

£50 per hour standard rate

Creative artwork services

We have our own in-house design team, who have decades of experience in creating beautiful artwork and page layouts. Not only do they have the skills, but they are also used to working with clients like you and the sort of products and services you offer.

Print advertising design service

- Adverts designed for use only with Europa Science publications £595 per advert;
- Adverts design, including copyrights £1995 per advert;
- Advert amendments (as part of same campaign), £100 per amend.

Digital advertising design service

- Adverts designed for use only with Europa Science publications £595 per advert;
- Animated digital (multiple pane) advert £895;
- Advert design, including copyrights £1995 per advert (single or multiple pane).
- Amends £100 each.

Europa Market Intelligence Ltd

Europa Market Intelligence (EMIL) is the sister company of Europa Science.

Launched in 2018, EMIL was created to help companies gain insight, competitive intelligence and leads within the industries that Europa Science currently operates.

EMIL provides the next logical step for those companies for whom detailed, depth of knowledge is paramount.

We focus on the identification and delivery of niche audiences, the application of data science to existing data sets and the uncovering of quality insight by taking a bespoke and qualitative approach.

Competitive Intelligence

Use EMIL to scope fresh markets, and research areas that you could be working in; or to help you understand why you should stay well away!

- “How can we find out if there is a market for our product?”
- “Is our database covering the whole market – or are we missing out on market share?”
- “We want to expand, but we don’t really know the size of the market in countries outside our territories”
- “Technology change means that our products are relevant to new sectors – but which ones?”

Data Building

Everybody worries about lead generation, and rightly so – today’s leads are tomorrow’s business. EMIL can start a lead generation project from scratch, and build you a bespoke data package.

- “We need leads! A lot more than we’re getting now.”
- “How do we target a specific demographic?”
- “Bought-in lists are just not working. The data are too broad, they don’t have the specific information we need.”
- “How can we get leads for a brand new technology – there are no lists, no events and no publications covering this development”

Data Science

A database of names and addresses is not data – it’s a mailing list. As well as assessing the quality and accuracy of your lists, EMIL will use data science methods to analyse your current set and identify where you can detect weakness, logically build in improvements and make your data work harder for you.

- “We’ve used the same database for years – how can we make it relevant for the technology changes that affect our markets?”
- “What can my existing customer base tell me about how to approach new markets?”
- “I worry that 80 per cent of our list seems to be focused on 20 per cent of our products. What can I do about this?”

189mm (W) x 85mm

Recommendation

If you are supplying a bleed ad we recommend that any text or important information is placed at least 10mm from the edge of the advert, to allow for any discrepancies when the magazine is trimmed at the printers.

Trim

These dimensions are where the page will be cut if you would like your advert to run right to the edge of the page, and represents the final dimensions of the printed magazine.

Bleed

In printing, bleed is printing that goes beyond the edge of where the sheet will be trimmed. In other words, the bleed is the area to be trimmed off.

Non bleed ad

This is the size to create your ad if you wish the advert to have white space all around it on the page, and not run to the edge of the page.

Digital file requirements

PDF-X1a, PDF, EPS, TIFF files are all accepted. All high-resolution images and fonts must be embedded in files. Images must be 300dpi/cmyk
